

## Washbasin unit DN 3

### For low DHW demand.

---

The DN 3 washbasin unit is a small, hydraulically controlled instantaneous water heater which supplies hot water to the washbasin for hand washing. It is easy to operate as the required water volume and temperature can be adjusted easily via the integral rotary selector. A tap is already integrated, with a stainless steel spout and water jet controller.

#### The most important features

- For hot water at the washbasin
- Easy to operate
